## (FREQUENTLY ASKED TREE QUESTIONS)

Planting ten million trees for Pennsylvania takes a lot of hands. We're collaborating with national, regional, state, and local agencies, conservation organizations, outdoors enthusiasts, businesses, and citizens to make it happen. Here are a few commonly asked questions before you get started.

**Q: What kinds of trees are available?**

A. Our inventory includes hundreds of native trees, including fruit-and-nut-bearing varieties, species attractive to wildlife and pollinators.

**Q: How many trees can I request?**

A. There is no maximum number of trees that can be requested. The minimum order is 25 trees.

**Q: How do I know which trees are best for my needs?**

A: Our team will connect you with a partner for an on-site evaluation to suggest where and what to plant. They will evaluate your needs and suggest the trees that provide the best benefit to your property – whether that's holding a streambank in place, maintaining a productive stream-side forest, cleaning water, or increasing your property value.

**Q: I don't have a stream on my property. Do I still need trees?**

A: Yes! Trees can improve many aspects of your land, including holding topsoil in place, providing shelter and shade for livestock, contributing to a healthy ecosystem, lowering heating and cooling costs, and increasing your property value.

**Q: Is there assistance available for planting?**

A: Yes! We have an extensive network of partners and volunteers who can help you plan and plant your trees.

**Q: Is there funding available for planting and maintenance?**

A: Yes! Current tree-planting grants are available from many counties across the commonwealth, giving you a unique opportunity for a positive return on investment. Many PA counties offer technical assistance; including grant funding for streamside preparation, planting, maintenance, and incentive funding. [Email link here.]

**Q: How many trees have you planted so far?**

A: Visit [TenMillionTrees.org](https://TenMillionTrees.org) for an up-to-date count of the trees we've put in the ground thus far and follow us on social media to follow our progress:
